

“Hamilton Form Company has been our go-to supplier for quality, steel-built forms.

At Coreslab Structures, we engage Hamilton Form at the early stages of design and collaborate with them on the shape, length and versatility of the casting molds. That level of collaboration has led to the successful completion of many projects over the years.”

Rick Reichenberg  
V.P., General Manager  
Coreslab Structures (ARIZ)

## Nobody Does It Better

When Coreslab Structures (ARIZ) needed custom forms for the Compass Moonraker Data Center in Goodyear, Arizona, they called on the one company they knew could get the job done – Hamilton Form Company.

Hamilton’s double tee forms were used in the creation of the structures to achieve long, clear spans that support the heavy weight of the equipment and cooling systems. The Compass Moonraker data center features over 242MW of capacity on a 190-acre campus.

Nobody does it better, together –  
Coreslab Structures (ARIZ) and Hamilton Form.

**For more than 55 years -  
Precast. It’s all we do.**
