**We have a gift for you**  
**Visit us at the Precast Show**  
**in Kansas City March 2-5**

**Booth #2127**

In early March, many of us will be in Kansas City at the annual Precast Show. While you are there be sure to visit the **Hamilton Form Company's booth #2127**.

We have some very unique lenticular luggage tags ready for you to insert your business card and put on your luggage when you head back home!

Be sure to stop by early these tags won't last long.

**Precast is All We Do — Celebrating 55 Years**

It all began in 1967 in Hamilton, Tx and today, 55 years later, making custom forms and equipment for the precast industry is still all we do.

What's changed in five and half decades? In 2022 our team of engineers is larger and our equipment is much more specialized. The jobs we do for our precast client partners are highly specialized and we ship all over North America from our centrally located plant in central Texas.

But the company mission is the same; focus on our precast partner clients and the challenges of the precast/prestressed industry. New opportunities, innovative collaboration and putting our decades of experience to work lets us know custom forms and equipment will bring solutions.

## Hamilton Form Becomes First Presentation Sponsor for Project Precast

Students from universities across the USA are coming to the show to compete in the 3rd year of Project Precast. The live competition presentations will be held on Friday, March 4 from 2 to 4 pm in the KC Convention Center's Great Hall room 3501D.

The final design presentations are open to all show attendees, and we hope you join us – each team has to present a **WOW Factor** as part of their design. The 2022 winners will be announced Friday evening and the winning team wins \$3000.

**Hamilton Form Company is proud to be the first-ever Presentation Sponsor and support the future of precast.**

## How To Spend \$110 Billion in Federal Money?

The US government's newly-passed \$1.2 Trillion infrastructure bill allots \$110 Billion in federal dollars to repair and replace roads and bridges over the next 5 years.

Infrastructure investment, is an investment in opportunity, said President Biden. It is also an opportunity for the precast industry said Bob Mills with Hamilton Form Company.

“New and replacement bridges are far more advanced than they were decades ago when most of these crumbling bridges were originally built. Which means the need for more precise, intricate and highly engineered steel forms will be critical to the speed and volume of these repairs.”

Forms are more critical, and more complex, than ever before. We are already seeing inquiries come in with new jobs as the counties and cities across the US have already started the bid process. We realize the form design is one of the initial steps and our team will move quickly, efficiently and with a high degree of excellence to assure our precast client partners have no problem keeping up with this new, nationwide demand.

Hamilton Form has been making custom steel forms for more than 55 years and makes the custom forms for girders, deck slabs, next beams, bevel plates, pile caps, floor decks and other highly engineered elements that will be necessary for the bridge replacement and repair work coming down the pike. We look forward to working with architects, engineers and producers to demonstrate the benefits of prestressed and precast concrete to assure these repairs and new bridges last for another 100 years.

The Governor Mario M. Cuomo Bridge, (photo) which spans the Hudson River in New York, has its own webcam and a public calendar of events including a schedule of its changing light show.

## A Note from Peter Ollmann, President

*The entire team here at Hamilton Form Company sends each of you thanks for contributing to our success for more than five and a half decades.*

*What's ahead will surely bring precast and prestressed concrete to greater prominence. We look forward to playing a role in your success in the years to come.*

*Feel free to share this e-newsletter with others and reach out to let us know how we can help you.*

— Pete
